We adopt a comprehensive learning pedagogy for upskilling of public sectors through blended approach. We perform a complete life-cycle of online learning, e-Learning solutions development, blended learning, mobile learning, curriculum development, and facilitation of workshop.

Course Overview

The Certificate and Diploma program in Diabetes Educator has been designed to respond to the global epidemic on obesity and diabetes. The program focuses on developing the skills of individuals to be able to work in multi disciplinary teams and display collaborative approach towards the management of diabetes. The program prepares candidates to provide competent care to patients and families with the management and control of diabetes. The program has a blended approach encompassing both theory and clinical aspects offered through Webinar Sessions, group work and On-the-Job Training. The program has been structured to provide progressive group learning among students enrolled through presentations and group work.

Who is a Diabetes Educator?

Diabetes Educator is a healthcare professional involved in the care of patients suffering with diabetes.
