Growth Potential
(Certificate course in Medical Laws & Bio-ethics)

Course Overview

Medical laws & Bioethics is a fascinating field of study in the 21st century as advances in medical research and new technology shift the boundaries of medicine.

New health issues are emerging and patients are increasingly becoming aware of their rights. Legal issues are increasingly taking centre stage. New and complex medico-legal dilemmas are arising in clinical practice, in the realities of human health, and in the relationship between patients and health care professionals.

The certificate course in Medical Laws and Ethics at AIIS is positioned at the constantly changing interface between medicine and law.

Learning Objective

- To understand the fundamentals of medical laws & ethics related to medical practice
- To be able to create processes, procedure and SOPs for the organization to prevent complications related to legal provisions & ethical standards in medical practice
- To be able to anticipate & pre-empt legal issues at an early stage to initiate effective damage control measures
- To be able to respond to the complaints / grievances at the organization level or in the redressal for a under various laws
